

PLEASE continue to protect New Jersey residents from being bombarded with unsolicited phone calls. We use to receive S0000 many phone calls it really seemed intrusive--especially because we seem to have so few moments to relax together each evening. (In the past, we would get up to three calls in a row during dinner!!)

Please continue to support and allow our DO NOT CALL. There are many other options for those marketing and pushing products and services to use that are less offensive to consumers like my husband and I. Thank you for helping us to maintain precious, quiet moments that we would rather share together--without interruption from strangers that tend to pressure us for items and services that we have completely no interest in, no matter what they may offer over the phone.
